

AQUAFLOW

Water Based Hydraulic Fluid

- Ready to Use • Excellent Protection Package
- Great Lubricity • Perfect for all Carwashes

FEATURES AND BENEFITS

Designed to meet the demands of today's car wash hydraulic systems. AQUAFLOW is rated as a less hazardous product, fire resistant, and rated by the DOT as nonhazardous. AQUAFLOW is safe for reclaim systems and requires no shutdowns for related to clean-up as is the case with mineral oil based hydraulic fluids. AQUAFLOW is formulated with corrosion inhibitors, wear additives, and lubricity additives to allow the maximum performance of the hydraulic system. AQUAFLOW passes the following tests:

- ASTM D2882, 2,000 psi pump test using a Vickers V 104C pump.
- Rust Test D665
- Four Ball Wear D-4172 Test
- Four Ball Wear S-205 Test

Recommended Usage

AQUAFLOW is a ready to use product. AQUAFLOW should be installed into the reservoir tank of the hydraulic power pack. When replacing mineral oil based product in the hydraulic system, please make sure that the entire system is relatively free of mineral oil based hydraulic fluid prior to installing AQUAFLOW. Quick Flush is a biodegradable detergent designed to clean out the hydraulic lines prior to installing AQUAFLOW. Consult your distributor before performing a changeover from mineral oil.

Recommended Application

AQUAFLOW is a ready to use product. Install at room temperature.

Special Notes

AQUAFLOW is a water/glycol product. Please read MSDS before using AQUAFLOW.
